Education Finance Analysis

School Funding, Inflation & Student Performance

Ken Wolf & Bob Fallen
June 5, 2024

About The Authors

Ken Wolf: A former state legislator (R, Burnsville) and recognized expert in education finance who served as a member of the Education Finance Committee. Wolf published several papers addressing school finance and was appointed Chairman of the Subcommittee on Government Efficiency and Oversight.

Bob Fallen: Founder of *Local Elections Matter* with a mission to inform citizens about local school board governance processes and to motivate greater public engagement and amplification of matters that impact K-12 school districts.

GOP lawmaker disputes claim that state 'underfunds' schools

State Rep. Ken Wolf is attempting a difficult task — to explain Minnesota's arcane education finance system to the masses and to refute the claim that state aid has not kept pace with inflation.

STEVEN DORNFELD
ASSOCIATE EDITORIAL PAGE EDITOR

In an eight-page newsletter to his district, the Burnsville Republican contends that unrestricted state aid to school districts has exceeded inflation by 9 percent since 1991. He says total state aid — including money earmarked for specific purposes — has exceeded inflation by 14 percent during the same eight-year period.

Wolf, who serves on the House school finance committee, says he prepared the newsletter because he got tired of hearing school officials say that "the state has 'underfunded' education year after

year,' especially in the years Arne Carlson was governor."

"I took it kind of personally," he says.

Wolf, a former computer program and a numbers whiz, supports his assertions with a series of charts and graphs illustrating how the system works and how state support for schools has risen. He also contends that the system has been slightly more generous for the Burnsville district than for school districts statewide.

Duane Benson, president of the Minnesota Business Partnership and a former state senator, praises Wolf's newsletter as "almost revolutionary in this day and age. He's saying to his constituents: 'Stay with me now. I'm going to take a complicated issue and I'm going to try to explain it.'"

Officials of state education groups and the Burnsville school district express doubts about the accuracy of some of Wolf's numbers, but to date they have offered none of their own.

Wolf's newsletter went out over the Memorial Day weekend as Burnsville

School District 191 and a number of suburban districts like it were beginning to grapple with some difficult budget problems for the coming year.

Although the Minnesota School Boards Association has heralded the \$7.9-billion school aid package passed by the 1999 Legislature as the most generous in a decade, a number of districts are talking about the need to lay off teachers and make other "budget cuts."

Rep. Ken Wolf is attempting the impossible — to explain to constituents how Minnesota's arcane education funding system works.

In most cases, these "cuts" are not really cuts at all — but reductions in the spending increases that districts would like to make.

The main reason for the budget problems in many districts is that they have flat or declining enrollments. The bulk of state aid is distributed on a per-pupil basis.

But the Legislature did increase the amount of per-pupil aid by 4.7 percent in the first year of the biennium and 3.2 percent in the second year. It also provided a "partial cushion for districts with declining enrollments. And it approved

Wolf's report makes important distinctions

To the editor:

Rep. Ken Wolf's (R-Burnsville) recent report, "Education Finance," has received a lot of attention, as it should.

If we are going to effectively involve parents and individual teachers in improving student achievement then we must ensure they have useful information. In the world of education finance and arguments over school funding, it's easy for people to throw around enough figures and accusations to confuse a brain surgeon.

Most people agree teacher compensation takes up the majority of any school district's budget. And, as illustrated by the trade-offs made by the St. Paul School District, we often end up having to decide between educational program offerings and differing levels of teacher pay raises.

To make the most informed decisions, we need to be able to distinguish between the increases actually received by individual teachers and the increase in the overall salary schedule. Generally, compensation for individual teachers exceeds the increase in the salary schedule.

Rep. Wolf's report did a marvelous job at making that important distinction. Next time your local school board announces a salary settlement calling for yearly compensation increases of 2.8 and 2.7 percent, you can ask if that is for individual teachers or for the salary schedule. By boiling it down to the impact on individual teachers, we can more accurately discuss if it was enough.

Rep. Wolf's report, combined with other legislative changes are making it possible for parents and teachers to better understand the issues of student achievement and school funding. Ultimately our children will be the ones who will benefit from these efforts.

Duane Benson
Executive Director of Minnesota Business Partnership

ISD 721 New Prague Education Funding vs. Inflation (CPI)

The Combined Revenue in ISD 721 New Prague exceeded inflation by 14.24% from 2013-2023, driven primarily by a 5.65% increase in student enrollment (ADM). **Over that same period, per-pupil funding went from \$ 8,480 to \$ 11,228, an increase of 32.4%. Per-pupil funding increased an average of 3.24% per year, 0.68% above CPI.** Thus, the narrative that school funding has not kept pace with inflation is false.

Understandably, the public does not fully grasp the nuances of K-12 finance, and when they are told that K12 funding has lagged inflation, they assume the statement to be based in fact. However, strictly looking at the “Basic Formula” does not represent a complete picture of education funding and provides a misleading story communicated to the tax-paying public. The true measure of school funding is the Combined Revenue reported by the Minnesota Department of Education, that combines State Aid and Local Levies. This is the only way to get a complete picture of the adequacy of education funding on a district-by-district and statewide basis.

Cost structures for school districts vary, with many nuances and variables related to expenditures. However, the following information is based 100% on factual data available to the public.

ISD 721 New Prague 20-Year Total Funding vs Inflation (CPI)

Description	FY 2003	FY 2023	# CHANGE	% CHANGE	NOTES
Average Daily Membership (ADM)	2763	4098	1335	48.32%	Student population increased by 48.3%, from 2003 to 2023.

Addendum 1: Education Funding Sources in Minnesota

For decades, the education community in Minnesota has stated that school funding has lagged inflation. The current version of this sentiment is that *the basic general education formula has lagged inflation* for the past 20 years. The basis of this premise is rooted in the **Estimated General Fund State Aid and Levy Revenues**, published by the Minnesota Department of Education (MDE). The “Basic” formula is one of only six commonly used categories utilized to calculate school funding from state and local sources:

- 1) **Basic Formula**
- 2) **General Education**
- 3) **Special Education**
- 4) **Combined Aid**
- 5) **Combined Levies**
- 6) **Combined Revenues**

Basic represents the foundation of school district revenue, while Combined Revenues represent the total of state and local sources that fund public education. The term “basic general education formula” does not exist in the MDE database.

Addendum 2: Commonly Used Funding Categories

Basic Formula. The base level of public school funding (state aid), representing 54% of Combined Revenues statewide in 2023, down from 70% in 2003.

Basic General Education. The same as Basic.

General Education. Combination of funds for the operations of the school district (state aid), representing 77% of Combined Revenue statewide in 2023, down from 84% in 2003.

Combined Revenue. The sum of all school funding from state aid and local levies, representing 100% of funding. The true measure of school funding.

Combined Aid. Revenue provided by State government sources (State Aid), representing 79% of Combined Revenue statewide in 2023, down from 92% in 2003.

Combined Levies. Revenue provided by Local government sources (Local Levies), representing 21% of Combined Revenue statewide in 2023, up from 8% in 2003.
